By far this is the best game I've ever played! I love all the skins worlds and in my opinion there is nothing wrong with the game !!! I have been playing for about 2 weeks and it has not grown old the gemfish are fun to look around and the sharks look awesome ! My favorite shark is the dark magic shark, it's so cool and I just got it!! Also evolution is an amazing game too and the sharks look so real, but so fake at the same time that is really cool. Thank you for the free Makhai in the world and he has the coolest skin ever the vamps is very fast and deadly. Also the games have been so much fun and maybe one day you can release a new hungry shark game with all the sharks and maybe a few new sharks. I think you should make a flying shark that can breathe all sorts of things like water ice fire etc. Good work at stake and I can't wait for the next update !!! Also I had another idea that you should make a bomb shark that has a bomb for a head and eats bombs and fires them at people and helicopters if on the jet pack and it would be so cool, my idea to see in the game and also I think a new map is a cool idea maybe it could be on other planets like Mars and the moon that would be cool, but I think the dark magic shark or Baldr should try warp forces like in Hungry Shark also. hungry shark heroes put in the app store I love this game, I think it's awesome and everything you can eat fun, and I'm really good at the game, but I'm really good at it , and even when it got to full level it was tiny. So please make this shark/whale bigger, or at least make it smaller in the shop because it makes the Orca Arta seem like a rip-off. But despite the fact that this shark/whale as big as I want, I still think it's one of the greatest games I've ever played. (Future) I just got the robo-shark and it's kind of weird, it doesn't eat all the mines, and when I was blown up by one, I had blood. Blood. Do you think the robo-shark should have black oil for its blood, and maybe some gears come out? I also think if it's starving or critical to health, it should make beeping sounds like from hungry shark evolution. I know it may seem like a lot, but I know that the robo shark is the latest and it could have a few problems, but if you add all of these, I will be very happy. And I also read someone else's review, and they said that some sharks are not able to be seen in the wild, like robosharks, sun sharks, zebra sharks, helicoprons and all that. So maybe you can add a new map???? So much update that I want and so much hard work to make it happen. But if you can achieve this, please do so and I appreciate it very much. Thank you very much.
